

Hair Removal

Please start your hair removal as soon as possible. **You should allow at least 6-9 months for optimal hair removal. It is important that you do not have any hair removal sessions within 2 weeks of your surgery date.**

We recommend electrolysis, for more permanent hair removal. Your hair removal provider will be able to offer guidance on the most appropriate type of hair removal for your specific skin type and goals.

Some insurance plans offer coverage/reimbursement for pre-operative hair removal. You will need to verify with your specific plan to see if this is an option. Your hair removal provider will be able to assist you with the required documentation.

If you have any questions or concerns regarding hair removal do not hesitate to reach out to our office.

Vaginoplasty Hair Removal Template

Ideally, all hair should be removed from the genitalia and perineum. Green and yellow boxes.

If you are only able to complete limited hair removal sessions, remove all the hair at the base of the penis, generally a 2-inch area all the way around.

If hair is present on the shaft of the penis that should be removed as well.
